Precipitation probability							
<05%	10%	60%	80%	70%	60%	40%	40%

Forecast for Thursday 05 Aug 2021

Weather: A cloudy start to Thursday, before a band of rain, heavy at times, passes over the park from mid-morning. Further showers, sometimes heavy, follow on behind this through the afternoon and evening, with the odd chance of one turning thundery. Staying largely cloudy in between the showers and into the night.

Chance of cloud free mountain/hill tops above 600m: 70% in the early hours, dropping to 30% by late morning.

Visibility: Moderate visibility first thing, but soon turning poor with the passage of the rain - very poor in any heavy rain and showers. Cloud through the first half of the morning partly above the summits, but with temporary reductions to 500-600m. Bases widely falling to 300-400m in association with the rain band, and possibly further at times, obscuring many slopes and summits.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Waterproofs will be required for much of the day and care should be taken when walking on wet and slippery paths.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Wed 04 Aug 2021	0mm	1.4mm	3.2mm

Forecast for Friday 06 Aug 2021

Weather: A day of scattered showers from the offset, with these being heavy and thundery at times. The showers could also merge together into longer spells of rain. Remaining cloudy between the showers.

Maximum wind: Winds on the summits southwesterly 30mph, gusting 40-45mph.

Chance of cloud free mountain/hill tops above 600m: 30% through most of the day, rising to 60% in the evening.

Visibility: Generally moderate visibility, dropping to poor in any showers and very poor in any heavy ones. Cloud bases 300-400m through much of the day, falling further in association with the heaviest rain, which will obscure many slopes and summits. Bases rising to 600-700m come the evening, but still with temporary reductions to lower heights.

Temperature: **Valleys:** Plus 13 Celsius, rising to plus 19 Celsius.
At 600m: Plus 10 Celsius.
Freezing level: Above the summits.
